

Public Health and Medical Professionals for Transparency

This nonprofit, made up of public health professionals, medical professionals, scientists, and journalists exists solely to obtain and disseminate the data relied upon by the FDA to license COVID-19 vaccines. The organization takes no position on the data other than that it should be made publicly available to allow independent experts to conduct their own review and analyses. Any data received will be made public on this website.

JOIN

Four days after the Pfizer vaccine was approved for ages 16+, we [submitted](#) a Freedom of Information Act Request to the FDA for all of the data within Pfizer's COVID-19 vaccine biological product file. We have now [sued](#) the FDA for not releasing the data. Click below for court documents and for productions of Pfizer's documents from the FDA.
